

## **JesusWORKS (follow-up) Video Questions**

Thanks for agreeing to be videoed about *JesusWORKS*.

The footage will be used in different formats to help promote the *JesusWORKS* course. Below are the questions you will be asked, but please don't be freaked out. They are offered because it is helpful to come to filming having reflected on the course in specific areas. For some of these questions, you may have nothing to say, which is fine. For other questions, they might want to draw out something that you found very helpful in the course – that is the kind of footage we are after.

The format is like an interview - with you being the only person on camera, talking to the interviewer who is off camera. That means you don't have to stare into a camera and the whole exercise should be more relational. There will be no opportunity to read out any written answers, so don't burden yourself by crafting your answers to the following questions. A suggestion, if you are worried about getting out your answers helpfully, would be just to bullet point your reflections for the questions below so you can refer to them on the day of filming. Please don't stress about this exercise.

The footage will then be edited and you will be shown a copy to approve before we use the footage publicly.

Hope that is helpful. Thanks again for doing this.
